

Probiotic Microorganisms

The healthy body naturally hosts trillions of beneficial bacteria. Amongst other things, they help to support and maintain a strong immune system and a healthy digestive system. Today's lifestyle of stress and poor nutrition can compromise these essential functions.

Why Bio-Kult®?

The complete formula in Bio-Kult® helps balance and maintain these natural systems against pathogenic and opportunistic organisms. It is of fundamental importance that we have an adequate level of these probiotic bacteria in our bodies at all times. With fourteen strains of beneficial bacteria at a concentration of 10 billion per gram, Bio-Kult® is one of the most powerful probiotic supplements available.

Recommended Daily Intake

One to two capsules twice daily with food.
Children under 12 - half dose. Or as directed by your health practitioner or doctor.

Do not exceed the recommended daily dose.

Food supplements should not be used as a substitute for a healthy lifestyle or a varied, balanced diet.

Bio-Kult® has been formulated by a team of doctors, nutritionists and scientists dedicated to advancing the research and use of probiotic health supplements.

Allergen statements: Contains traces of soya. Contains traces of milk products at a level which would not affect lactose intolerance sufferers. Keep out of reach of children.
